Feeding Conveyor CMD 600 & CMD 700

Product Description

The **DETECTRONIC** conveyor belt series are unique and innovative in their design and quality. The feeding conveyor which often are commonly suited with **DETECTRONIC** Metal Detectors, are used for feeding blocks or fresh meat products to grinders, mixers, or other types of processing equipment. Regardless of the structure and configuration our conveyors is designed for fast and effective sanitation, from wipe down to daily high-pressure wash down with chlorinated cleaners.

DETECTRONIC A/S can provide feeding conveyers as standalone units, or combined with our metal detectors.

Demands are high in modern day food production and reliability and tough machines are required to keep production going at a profitable pace. As a machine supplier it is your obligation to make sure, that the machines we provide assures a maximum amount of up time within the production. **DETECTRONIC A/S** provides that quality through our high skilled craftsmen, our quality assurance system and our renowned customer service.

DETECTRONIC A/S is one of the few companies who build both metal detectors and conveyor belt systems conveyers in house. We have built feeding conveyor belts systems since 1971, and therefore we have grown with the industry. We understand the concerns and challenges in modern day food industry. Whether your needs are in meat, poultry, or seafood industry, you can rely on our 40 years of experience. This gives us the advantage of understanding both machines and providing a reliable and lasting solution.

DETECTRONIC A/S provides a series of conveyer belts for selected brands, as well as custom made systems enabling us to reach the optimal solution. We rely on our experience, flexibility, our quick response towards our customer's requests and our innovative thoughts towards the best solutions for our customers.

We use only material approved by USDA, FDA, NSF.

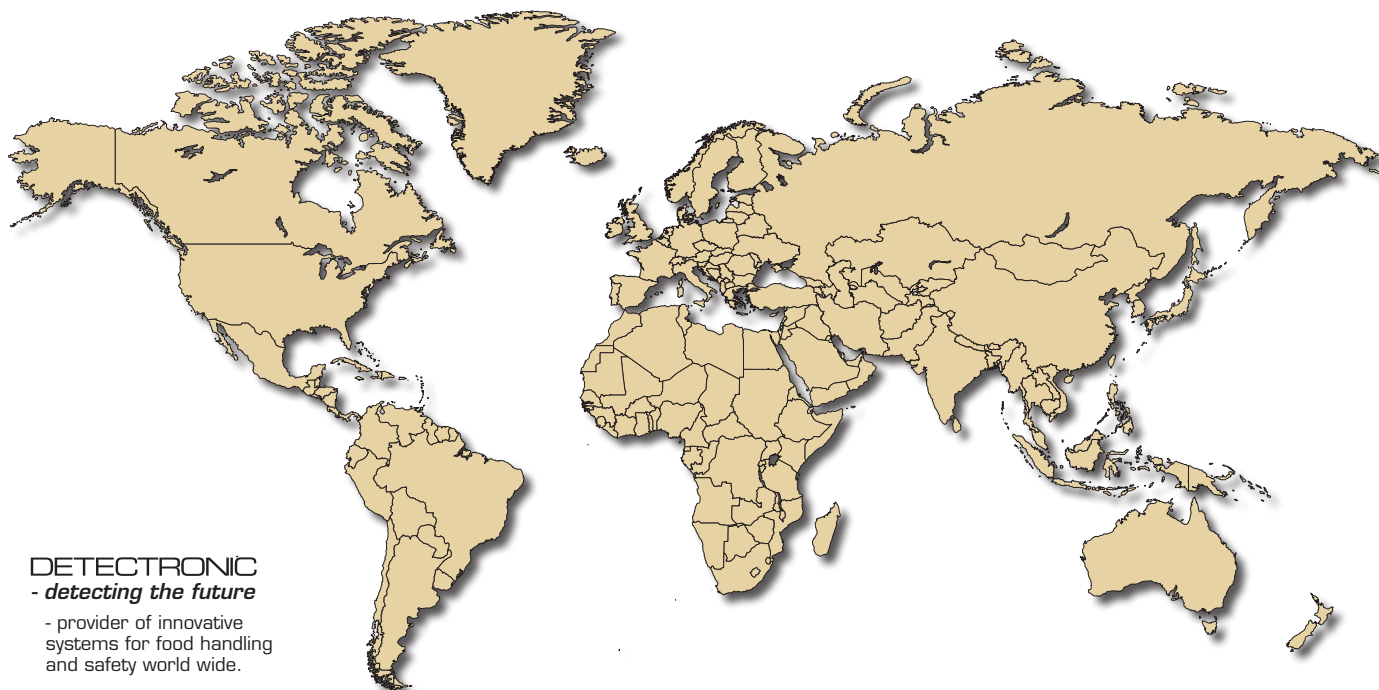

TECHNICAL DATA	CMD 600	CMD 700
Type Dimensions *
